

THE STATE OF NEVADA
PERMIT TO APPROPRIATE WATER

Name of applicant: SAVED BY GRACE LUTHERAN CHURCH
Source: UNDERGROUND
Basin: PAHRUMP VALLEY
Manner of Use: COMMERCIAL
Period of Use: January 1st to December 31st
Priority Date: 06/06/2008

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This permit is issued under the provisions of NRS 534.120(2) as a preferred use under State Engineers Order #1107.

Permit 77115 is issued for commercial water service for the 2.5 acre parcel identified by the Nye County Assessor as APN 45-224-03. Upon cessation of pumping for commercial purposes at this place of use, the water under Permit 77115 shall return to the groundwater source and no application to change or relinquishment will be allowed.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.025 cubic feet per second or 2.0 acre-feet annually.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

December 9, 2009

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

December 9, 2011

Map in support of proof of beneficial use shall be filed on or before:
